Number of Employees:	59
Founded:	2008, Sweden
Signs Sold to Date:	6 800 000 pcs
Countries Delivered to:	121

OUR STORY

SignMax was founded by cousins David Engstrand and John Gustin in May 2008.

When ordering signs online, David, who had a background in programming, was inspired to solve some key limitations. Not long after, he created the first version of our Design Page – the tool that makes it possible for customers such as yourself to design your own signs online.

John had barely thought through the business model by the time David had bought and installed their first engraving machine. Not long after, they sold their first sign and and from there the company grew, imbued with two of David's core values: spontaneity and dedication.

OUR MISSION

Signomatic is an innovation sign manufacturer who has been digitizing the industry since 2008. Our goal is to offer you the widest range of products possible without sacrificing simplicity, price, and timely deliveries.

Our vision is to help both individual and business customers easily convey their unique messages.

FROM STANDARD TO SPECIAL

When creating a sign, you can use our assortment of standard designs and templates as a starting point. If those aren't quite what you're looking for, let us know! We are happy to explore new materials, sizes, and designs in order to suit your needs.

Popular Materials

Aluminum

Sizes from 70x30 mm up to 2000x1200 mm
Thickness: 1.5 mm (standard)
Text and images digitally printed
Anodized (rust-free material)

✓ UV-laminated ✓ Resistant to heat/moisture/cold

Stainless Steel

Sizes from 28x49 mm up to 170x70 mm
Thickness: 1 mm (standard)
Stainless, acid-resistent steel, manufactured with laser etching

✓ Resistant to heat/moisture/cold

Engraved Plastic

Sizes from 25x10 mm up to 560x560 mm
Thickness: 0.8 - 3.2 mm
Wear-resistant plastic signs in two layers, laser-engraved so that text and images are visible in the underlying colour

✓ UV-laminated ✓ Resistant to heat/moisture/cold

Acrylic

Sizes ranging from 100×50 mm up to 1400×900 mm. Thickness: 6 mm
Available in transparent, frosted, or printed acrylic. Text and images are digitally printed on the backside of the material. Appropriate for both in- and out-door use

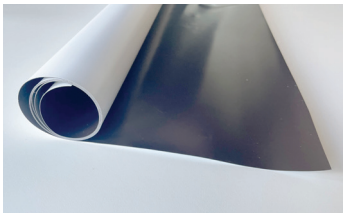

Vinyl

Sizes ranging from 30×30 mm up to 3000×550 mm. Thickness: 0.075 mm
Contour-cut text and/or images in vinyl film. Self-adhesive letters, numbers, or motifs for walls, windows, or vehicles. Appropriate for both in- and out-door use.

Decals

Sizes ranging from 15×15 mm up to 1200×1000 mm. Thickness: 0.075 - 0.205
Made of durable PVC-film or print vinyl. Wind and weather-resistant, intended for both indoor and outdoor use. Appropriate for use on floors, vehicles, windows, walls, and other flat surfaces.

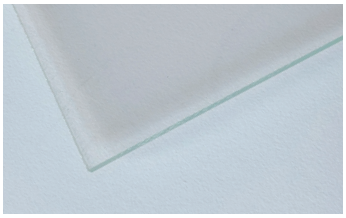

Magnetic Signs

Sizes ranging from 30×10 mm up to 1500×900 mm. Thickness: 0.6 mm
Single-sided, matte, UV-stable magnetic material, ideal for printing desired motifs. Apply to clean, dry, smooth surfaces for best adhesion. Appropriate for both in- and out-door use.

Brass

Sizes ranging from 50×18 mm up to 400×300 mm. Thickness: 0.51 - 8 mm
Our brass products, available in fixed sizes, are manufactured using digital printing. Appropriate for both in- and out-door use.

PVC-Free Plastic

Sizes ranging from 50×30 mm up to 1700×1200 mm. Thickness: 2 mm
Environmentally-friendly and sustainable material, perfect for indoor and outdoor use. Lightweight and easily hung for maximum visibility in shops, at fairs, and other events.

Plexiglas

Sizes ranging from 600×400 mmup to 2000×1200 mm. Thickness: 4 mm
Available in transparent, frosted, or printed plexiglas.
Safety screens in plexiglas (transparent) are now common in offices and stores to minimize the spread of infection.

Wood

Sizes ranging from 30×30 mm up to 1100×100 mm. Thickness: 4 mm
Made of MDF (Medium Density Fiberboard) with birch or oak wood veneer. Text and images are digitally printed and material is left untreated, making them suitable for indoor use only.

Posters

Sizes ranging from 100×100 mmup to 1200×4000 mm. Thickness: 0.192 mm
Digitally printed on high-quality photo paper and customizable in size, shape, and colour. Suitable for both indoor and outdoor use.

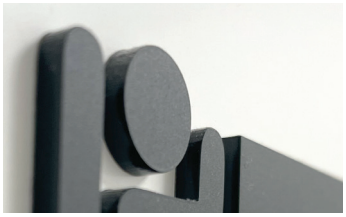

Roll-ups

Sizes 850×22 mm and 1000×2000 mm. Thickness: 0.22-0.33 mm
Smooth, stable, PVC- and curl-free polyester (PET). Opaque (gray) back results in a high-quality print with a matte satin finish. Aluminum cassette stands on the ground with double, extendable footrests.
Eco-friendly alternative material available.

Banners

Sizes ranging from 1000×500 mm up to 6000×1540 mm. Thickness: 0.47 mm
An affordable and flexible way of getting your message out. Made of moulded PVC with eyelets in the corners and along the sides for easy installation and display.

Contour Cut Signs

Sizes ranging from 15×15 mm up to 560×560 mm. Thickness: 3.2 mm
Typically made of black/white, UV- and scratch-resistant acrylic plastic (PMMA). Also available in aluminum, coloured Forex, PVC-free plastic, vinyl film, magnetic material, wood, and plexiglass.

Special

Table Signs

Digitally printed aluminum signs bent to stand on flat surfaces. Popular for use in hotels, restaurants and for A-frame pavement sign.

Engraved QR Codes

Engraved QR codes make your online information easily available. Works just as well when printed on acrylic or created as a decal.

Aluminum Numbers

Our contour-cut signs aren't limited to just one material. Ideal for displaying text, numbers, and logos on walls and facades.

Multi-coloured Vinyl

Popular for displaying messages on walls, windows, and vehicles, we can contour cut your message or logo in multi-coloured vinyl.

Techniques

Drilling

Our signs are supplied with round or oval mounting holes. Appropriate mounting accessories are available for all orders.

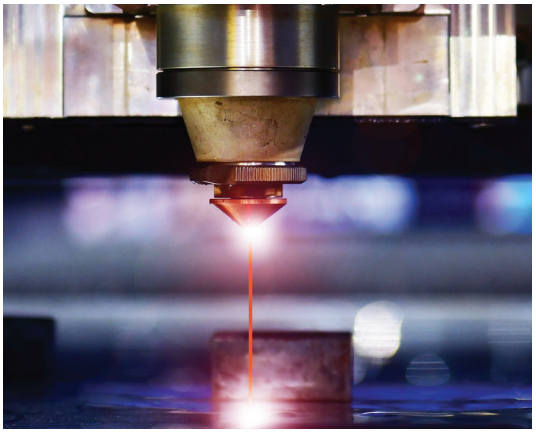

Lamination

For improved longevity and UV-protection, signs are coated in a protective laminate.

Notching

For angled signs, we use notching technology to bend them to the desired shape.

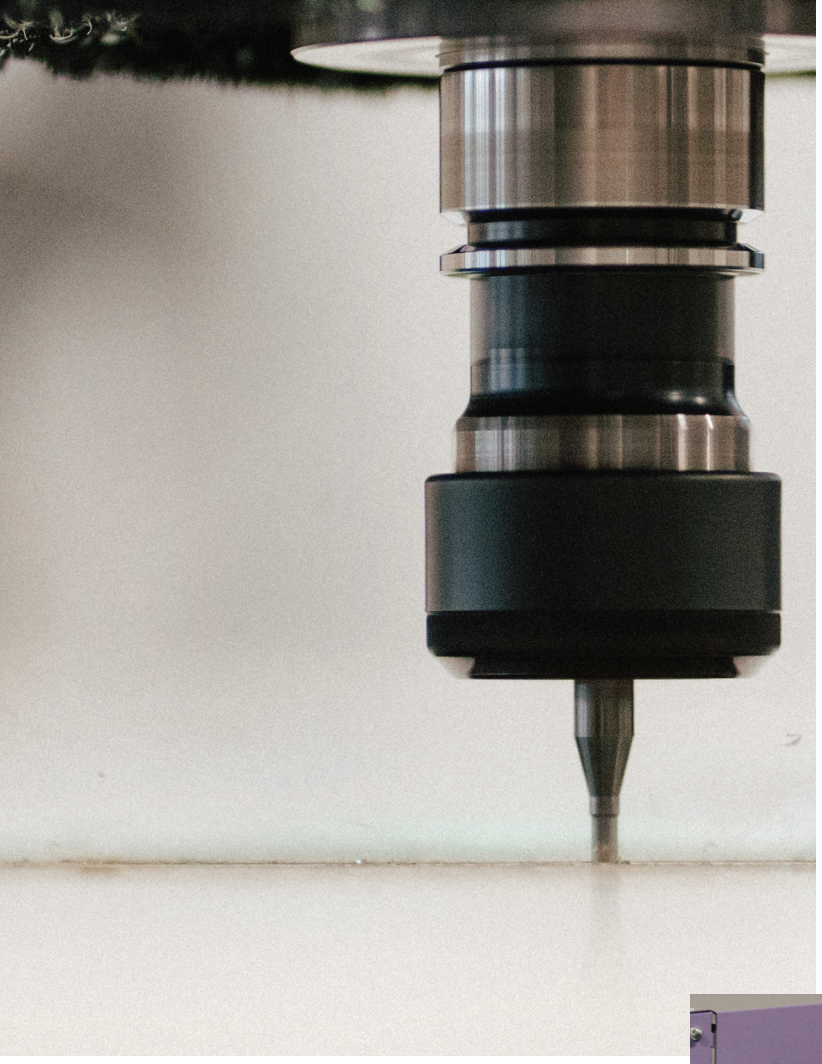

Laser Etching

Fiber lasers allow us to etch in several materials including stainless steel and aluminum.
The laser causes a chemical reaction, resulting in crisp, long-lasting designs.

Engraving

Our laser engraving machines are used mainly on 2-layered plastic. The first layer of coloured plastic gets burned away, displaying your desired design in the second, bottom colour.

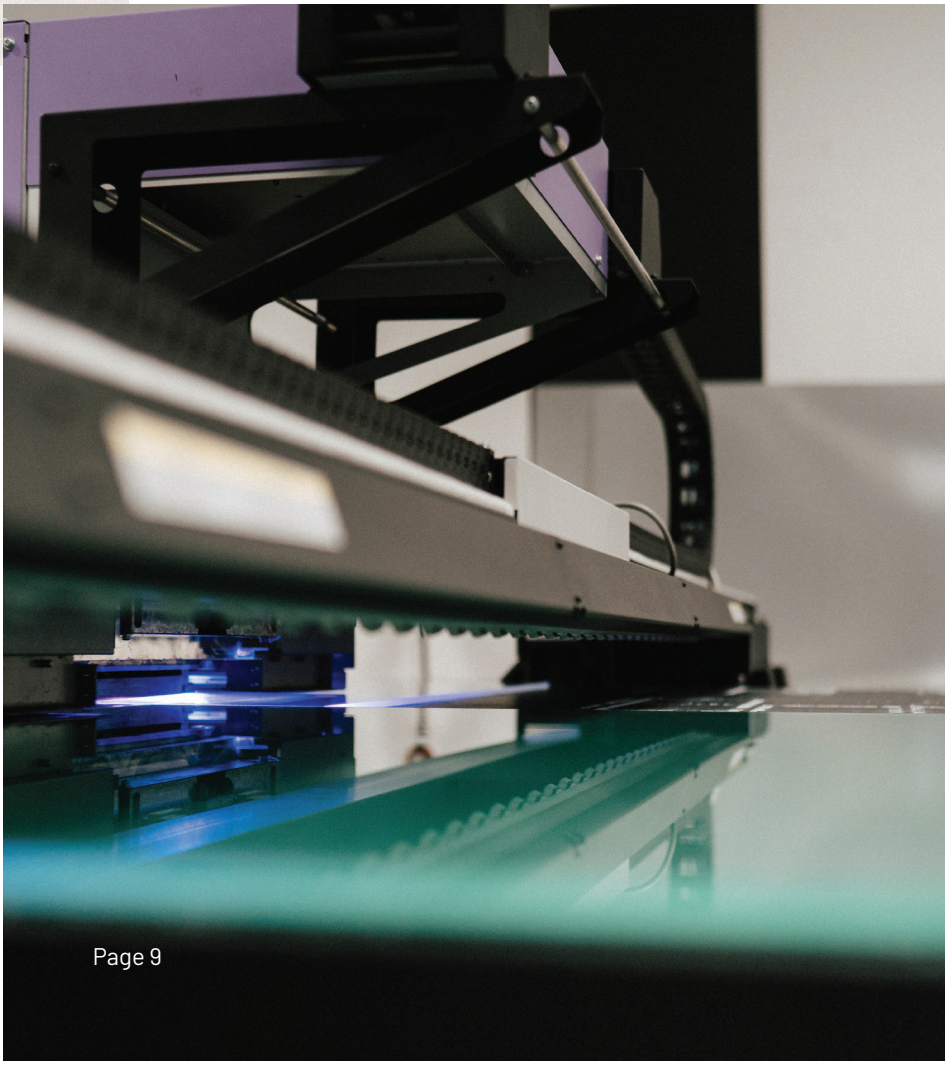

Milling

State-of-the-art, CNC-controlled milling machines make complex processing a breeze. Most shapes and materials can be milled to make your sign idea a reality.

Digital Printing

Our large format, flatbed printers quickly and efficiently print in multi-colour on a wide variety of materials.

We are a Team

When you order from us, our whole team works to ensure you receive the highest-quality products in an optimized timeline, all while keeping sustainability front-of-mind. Our processes ensure we use only as much material as is necessary.
